WORIK

**MAKE
WORK
BETTER**

Per noi **Make Work Better** racconta in 3 parole 3 aspetti: la novità, l'ambito e la performance.

“Rendere migliore il lavoro” significa infatti cambiare una situazione attuale in una differente, una promessa di **NOVITÀ** rispetto alle alternative. Significa non solo cambiare ma **MIGLIORARE**, quindi portare un valore aggiunto di performance, una novità utile, non fine a sé stessa. Infine l'ambito, il **LAVORO**, perché si tratta di prodotti destinati a chi lavora.

For us, Make Work Better tells 3 aspects in 3 words: novelty, scope and performance.

“Making the work better” in fact means changing a current situation into a different one, a promise of **NOVELTY** compared to the alternatives. It means not only changing but **IMPROVING**, therefore bringing an added value of performance, a useful novelty, not an end in itself. Finally, the area, **WORK**, because these are products intended for those who work.

**NON ABBIAMO
LA PRESUNZIONE
DI ESSERE I
MIGLIORI,
MA ABBIAMO
LA CERTEZZA
DI PRODURRE
IL MEGLIO.**

MANIFESTO

PRODUCIAMO ESCLUSIVAMENTE SKINWEAR

INTIMO DA LAVORO FUNZIONALE DI PRIMO STRATO

Realizziamo **calze tecniche** e **intimo tecnico** nel nostro centro produttivo in Italia, solo con la migliore scelta di fibre uniche e selezionate. Offriamo la **migliore qualità del made in Italy** anche nel design, grazie al nostro ufficio stile che disegna capi in grado di conquistare alla vista oltre che al tatto.

FIRST LAYER FUNCTIONAL WORK UNDERWEAR

We make technical socks and underwear technician in our production center in Italy, only with the best choice of unique and selected fibers. We offer the best quality of the made in Italy also in design, thanks to our style office that designs garments able to conquer to the sight as well as to the touch.

**QUALSIASI COSA
VI ABBIANO
DETTO DI NOI,
NON CONTA
NULLA.
SE NON AVETE
TOCCATO CON
MANO I
NOSTRI CAPI.**

Un entusiasmo tramandato da generazioni, che si rinnova ogni giorno da 35 anni, una competenza nella lavorazione dei filati che ha dato vita a 18 tecnologie originali. Ma il numero che più ci piace il 100% dei clienti soddisfatti.

An enthusiasm handed down for generations, which is renewed every day for 35 years, a competence in the processing of yarns that has given life to 18 original technologies. But the number we like the most is 100% satisfied customers.

**NON PRENDIAMO
LE MISURE DI OGNI
CONSUMATORE
FINALE MA
CI STIAMO
LAVORANDO.**

Progettiamo e ingegnerizziamo capi per vestire la pelle di artigiani, operai, vigili del fuoco, operatori civili, volontari di primo soccorso, tecnici di laboratorio, manager e tante altre figure professionali. **Prodotti con caratteristiche specifiche per esigenze diverse.**

We design and engineer garments to dress the skin of artisans, workers, firefighters, civil workers, first aid volunteers, laboratory technicians, managers and many other professionals. Products with specific characteristics for different needs.

**POTETE PURE
CHIAMARLI
ACCESSORI,
PER NOI SONO
FONDAMENTALI.**

Sono consumabili, vero, ma sono creati per durare a lungo. Accompagnano milioni di passi ogni giorno in una infinità di contesti differenti, sostenendo e proteggendo i lavoratori.

You can also call them accessories, for us they are fundamentals. They're consumables, true, but they're made for last a long time. They accompany millions of steps every day in an infinite number of contexts different, supporting and protecting the workers.

CONCEPT

Protech

PRESTAZIONI AI MASSIMI LIVELLI

I migliori prodotti per il settore professionale. Tecnologie e materiali certificati per la sicurezza.

THE HIGHEST LEVELS OF PERFORMANCE

The best products for the professional sector. Technologies and materials certified for safety.

Cool

I MESI ESTIVI NON SARANNO PIÙ UN PROBLEMA

Mantengono il corpo climatizzato anche in condizioni di caldo estremo. Tecnologia ed esperienza hanno permesso di realizzare prodotti freschi e traspiranti senza rinunciare alla protezione ed al comfort.

SUMMERTIME WILL NO LONGER POSE A PROBLEM

They keep the body climate-controlled, even in extremely hot conditions. Our technology and experience have resulted in the creation of fresh and breathable products without sacrificing protection and comfort.

Medium

GAMMA STUDIATA PER LE STAGIONI INTERMEDIE

Comfort, protezione, durata, sempre disponibili per chi lavora intensamente. Prodotti tecnici realizzati con filati High-Tech, rinforzi e strutture anatomiche per un fitting perfetto.

A RANGE DESIGNED FOR THE TRANSITIONAL SEASONS

Comfort, protection, durability, always available for those who work intensively. Technical products made with hi-tech yarns, reinforcements and anatomic structures for a perfect fit.

Merino

LA MIGLIORE SOLUZIONE PER COMBATTERE IL FREDDO ESTREMO

Prodotti testati nelle condizioni climatiche più difficili. Elevate percentuali di Lana Merino e grammature di tessuto garantiscono la termoregolazione anche in ambienti con temperature estremamente rigide.

THE BEST SOLUTION TO COMBAT EXTREME COLD

Products tested in the most difficult climatic conditions. High percentages of Merino Wool and fabric weights guarantee thermoregulation even in environments with extremely cold temperatures.

Warm

PRODOTTI TECNICI E PERFORMANTI PER L'INVERNO

Prodotti progettati per garantire protezione e comfort termico nei mesi invernali. Filati Hi-Tech e tecnologie all'avanguardia per una gamma completa di prodotti tecnici e indistruttibili.

TECHNICAL AND PERFORMING PRODUCTS FOR THE WINTER

Products designed to guarantee thermal protection and comfort in the winter months. Hi-tech yarns and cutting-edge technologies for a complete range of technical and indestructible products.

Business

LA MIGLIORE QUALITÀ ASSIEME AL MIGLIORE COMFORT

L'unione di innovazione ed artigianalità per la linea di prodotti tecnici da utilizzare tutti i giorni, in ogni ambiente e tipologia di utilizzo, anche nel tempo libero.

THE BEST QUALITY COMBINED WITH OPTIMUM COMFORT

Innovation and craftsmanship are combined to create the line of technical products for every day use, in every environment and all types of use, also in free time.

Supplies

PRODOTTI TECNICI PER USO INTENSIVO

Il meglio per tutti i tipi di lavoro, in ogni stagione.

TECHNICAL PRODUCTS FOR INTENSIVE USE

the best products for all types of work, in every season.

Leader Price

PRODOTTI ESSENZIALI CHE UNISCONO COMFORT E DURABILITÀ

Versatili per ogni tipo di utilizzo e stagione.

ESSENTIAL PRODUCTS THAT BLEND COMFORT AND DURABILITY

Versatile products for every type of use and all seasons.

MATERIALS

AMICOR PLUS® - Amicor Plus® è la più sicura, duratura ed efficace fibra antibatterica esistente sul mercato. Elevate performance di traspirabilità, fresco, bassa formazione di piling. Amicor Plus® contiene un additivo che conferisce un'eccellente protezione contro i funghi e azzerà una proliferazione dei batteri.

AMICOR PLUS® - Amicor Plus® is the safest, most durable and effective antibacterial fiber on the market. High breathability performance, cool, low piling formation. Amicor Plus® contains an additive that gives excellent protection against fungi and eliminates the proliferation of bacteria.

BIO COTTON - Fibra naturale che offre una gradevole sensazione di comfort grazie alla particolare capacità di assorbire e disperdere la traspirazione naturale del corpo. L'origine vegetale e i trattamenti di tintura in rispetto alla normativa OEKO-TEX la rendono particolarmente indicata anche per le pelli più delicate.

BIO COTTON - Natural fiber that offers a pleasant sensation of comfort thanks to the particular ability to absorb and disperse the natural perspiration of the body. The vegetable origin and the dyeing treatments in compliance with the OEKO-TEX standard make it particularly suitable even for the most delicate skins.

CARBON NO-SHOCK - Fibra in grado di dissipare le cariche elettrostatiche, azzerare la proliferazione di batteri e svolgere una funzione antistress. La capacità della fibra di carbonio in termini di prestazione dissipativa è la migliore fra tutte le fibre ad oggi esistenti e tale da rendere i capi rispondenti alle norme europee.

CARBON NO-SHOCK - Fiber capable of dissipating electrostatic charges, eliminating the proliferation of bacteria and performing an anti-stress function. The capacity of carbon fiber in terms of dissipative performance is the best of all the fibers existing today and such as to make the garments comply with European standards.

COOLMAX - Fibra cava con una struttura interna multicanale che veicola l'umidità e il sudore verso l'esterno dell'indumento, mantenendo la pelle fresca e asciutta. La sua leggerezza e le sue caratteristiche tecniche rendono la fibra tecnologicamente molto avanzata contenente fibre riciclate al 100% dal PET.

COOLMAX - Hollow fiber with a multi-channel internal structure that conveys moisture and sweat to the outside of the garment, keeping the skin cool and dry. Its lightness and its technical characteristics make the fiber technologically very advanced containing 100% recycled fibers from PET.

CORDURA® - Fibra ad alta tecnologia messa a punto per garantire la massima resistenza e durata, leggerezza e facilità di manutenzione. Offre una resistenza all'abrasione due volte superiore ad un normale tessuto di nylon testurizzato e resistente. Testata per sopravvivere negli ambienti più difficili.

CORDURA® - High-tech fiber developed to ensure maximum strength and durability, lightness and ease of maintenance. It offers twice the abrasion resistance of a normal textured and resistant nylon fabric. Tested to survive in the toughest environments.

CREORA® - È una fibra che ha proprietà uniche con un'eccellente capacità di tintura e solidità del colore in miscele con nylon, che è tinto con sostanze coloranti acide. Riflessione cromatica straordinaria, sfumature di colore più profonde e migliore solidità del colore dopo il lavaggio.

FILOSCOZIA® - Filato in cotone di altissima qualità, prodotto esclusivamente con varietà nobili a lungo tiglio, resistente e naturalmente lucente. Sottoposto a pettinatura, ritorcitura, gasatura e Mercerizzazione, rafforza le sue naturali caratteristiche e acquisisce irrestringibilità e un migliore grado di assorbimento.

FILOSCOZIA® - Very high quality cotton yarn, produced exclusively with noble long-linden varieties, resistant and naturally shiny. Subjected to combing, twisting, carbonation and mercerization, it strengthens its natural characteristics and acquires non-shrinkability and a better degree of absorption.

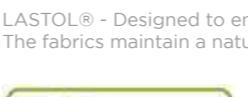

KEVLAR® - Una delle più importanti fibre aramidiche a livello mondiale, il Kevlar® ha sorprendenti doti di resistenza al taglio, alle abrasioni e al calore con un grado molto alto di assorbimento delle vibrazioni. Queste proprietà conferiscono ai capi resistenza e durata.

KEVLAR® - One of the most important aramid fibers in the world, Kevlar® has amazing qualities of resistance to cuts, abrasions and heat with a very high degree of vibration absorption. These properties give the garments strength and durability.

LASTOL® - Progettato per migliorare i tessuti naturali e sintetici, la fibra LASTOL® integra il tessuto ospite senza dare una sensazione di indumenti sintetici. I tessuti mantengono un aspetto naturale. Il calore e la resistenza chimica della fibra offrono performance della durata, comfort e facilità di cura.

LASTOL® - Designed to enhance natural and synthetic fabrics, LASTOL® fiber complements the host fabric without giving a synthetic feel. The fabrics maintain a natural look. The heat and chemical resistance of the fiber offers lasting performance, comfort and ease of care.

LENPUR® - È una fibra tessile ricavata da una risorsa rinnovabile: la cellulosa, accuratamente selezionata tra i rami di speciali alberi. Le straordinarie proprietà di questi alberi forniscono ai materiali tessili realizzati con Lenpur® proprietà straordinarie di morbidezza, capacità di traspirazione del sudore e proprietà antibatteriche.

LENPUR® - Textile fiber obtained from a renewable resource: cellulose, carefully selected from the branches of special trees. The extraordinary properties of these trees provide textile materials made with Lenpur® extraordinary properties of softness, perspiration capacity and antibacterial properties.

LYCRA® - Fibra elastomerica con proprietà uniche di allungamento e recupero della forma originaria. Le caratteristiche esclusive le permettono di essere allungata fino a sette volte rispetto alle dimensioni iniziali, per poi ritornare perfettamente allo stato iniziale, donando ai capi perfetto recupero della forma.

LYCRA® - Elastomeric fiber with unique properties of elongation and recovery of the original shape. The exclusive characteristics allow it to be stretched up to seven times compared to the initial size, and then return perfectly to the initial state, giving the garments perfect recovery of the shape.

MERYL - Microfibra sintetica con proprietà batteriostatiche. Mantiene un ottimale equilibrio fisiologico, non permette la proliferazione di batteri sui tessuti e la formazione di dermatiti e sfoghi cutanei. Offre inoltre elevate prestazioni di leggerezza e traspirabilità garantendo una temperatura corporea ottimale.

MERYL - Synthetic microfiber with bacteriostatic properties. It maintains an optimal physiological balance, does not allow the proliferation of bacteria on the tissues and the formation of dermatitis and skin rashes. It also offers high performance of lightness and breathability ensuring an optimal body temperature.

MICROLON® - In grado di garantire elevati standard prestazionali anche in attività estreme e condizioni climatiche difficilmente con proprietà batteriostatiche, di leggerezza e di traspirabilità. Fibra realizzata in poliammide tinto in pasta dagli straordinari vantaggi in termini di sostenibilità.

MICROLON® - Able to guarantee high performance standards even in extreme activities and difficult climatic conditions with bacteriostatic, lightness and breathability properties. Fiber made of dyed polyamide with extraordinary advantages in terms of sustainability.

NANOGLIDE® - Durevole, altamente resistente e traspirante per una rapida evaporazione. Le nano particelle di PTFE con cui è rivestito riducono l'attrito, diminuendo lo sfregamento sulla pelle che è causa di veschie e surriscaldamento. Protegge e rinfresca per tutta la durata di vita del capo.

NANOGLIDE® - Durable, highly resistant and breathable for rapid evaporation. The PTFE nano particles with which it is coated reduce friction, decreasing the rubbing on the skin which causes blisters and overheating. Protects and refreshes for the entire life of the garment.

NILIT® BREEZE - Un filato speciale che crea un esclusivo effetto rinfrescante. Conferisce flessibilità e morbidezza al prodotto finito. La sezione trasversale simile a quella del cotone dona elasticità ed una sensazione di benessere. L'uso di un polimero completamente smussato produce un tocco soffice e dà origine a una speciale ventilazione.

NILIT® BREEZE - A special yarn that creates an exclusive refreshing effect. It gives flexibility and softness to the finished product. The cross section similar to that of cotton gives elasticity and a feeling of well-being. The use of a completely rounded polymer produces a soft touch and gives rise to a special ventilation.

POLYPROPYLENE - Tecnicamente all'avanguardia, il polipropilene ha capacità termiche molto elevate e grazie alle sue fibre cava ha un peso medio inferiore del 40% alla lana ma con la stessa capacità di mantenere il calore corporeo. Questo si traduce in minimo ingombro, estrema leggerezza dei capi e grande libertà di movimento.

POLYPROPYLENE - Technically advanced, polypropylene has very high thermal capacities and thanks to its hollow fibers it has an average weight 40% lower than wool but with the same ability to maintain body heat. This translates into minimal bulk, extreme lightness of the garments and great freedom of movement.

TECHNO•P•E® - Elevate performance di traspirabilità, bassa formazione di piling e di comfort per massima durata del capo. Trasporta l'umidità dalla pelle alla superficie esterna del tessuto, dove può facilmente evaporare. Aiuta a spostare il calore all'esterno, dando un piacevole senso di benessere.

TECHNO • P • E® - High breathability, low piling and comfort performance for maximum durability of the garment. It transports moisture from the skin to the outer surface of the fabric, where it can easily evaporate. It helps move heat outside, giving a pleasant sense of well-being.

TENCEL® - È la fibra di pura cellulosa ottenuta da alberi di Eucalipto 100% biodegradabile. Regola l'assorbimento e il rilascio dell'umidità e la struttura fibrillare contribuisce a creare un microclima ottimale sulla pelle. Pelle asciutta e confort pari ad una seconda pelle.

TENCEL® - It is the pure cellulose fiber obtained from 100% biodegradable Eucalyptus trees. It regulates the absorption and release of moisture and the fibrillar structure helps to create an optimal microclimate on the skin. Dry skin and comfort equal to a second skin.

WOOL - In assoluto le lane più pregiate al mondo, sono un ottimo isolante dal freddo, grazie alle eccellenti proprietà termoregolanti. Validi aiuto nella prevenzione ai dolori articolari, assorbono l'umidità corporea in eccesso neutralizzando le sostanze nocive del sudore. Grazie alla morbidezza attutiscono le vibrazioni.

WOOL - Absolutely the finest wool in the world, they are an excellent insulator from the cold, thanks to their excellent thermoregulating properties. Valid help in preventing joint pain, they absorb excess body moisture by neutralizing the harmful substances of sweat. Thanks to the softness they dampen vibrations.

TREATMENTS

PRE WASHED - Lavaggio industriale pre-confezionamento che "fissa" la taglia ed ammorbidisce i capi. Disponibile su molti prodotti della gamma Worik.

PRE WASHED - Pre-packaging industrial washing that "fixes" the size and softens the garments. Available on many products in the Worik range.

TEFLON - Innovativo trattamento per filati e tessuti, conferisce ai capi in cui viene inserito impermeabilità, resistenza alle macchie e allo sporco senza alterare traspirabilità e il colore.

TEFLON - Innovative treatment for yarns and fabrics, it gives the garments in which it is inserted waterproofness, resistance to stains and dirt without altering breathability and color.

TREATMENT ANTI BACTERIAL AND SANITIZING - Trattamento antibatterico sanitizzante applicato durante il processo di pre-lavaggio industriale. Azzera la possibilità di proliferazione di batteri causa di irritazioni, micosi e muffe.

TREATMENT ANTI BACTERIAL AND SANITIZING - Sanitizing antibacterial treatment applied during the industrial pre-washing process. Eliminates the possibility of proliferation of bacteria that cause irritation, mycosis and molds.

STANDARDS AND MARKINGS

UNI EN ISO 11612:2015 - La norma specifica i requisiti prestazionali per capi di abbigliamento costruiti con materiali flessibili che sono progettati per proteggere il corpo del portatore, dal calore e/o dalla fiamma.

UNI EN ISO 11612: 2015 - The standard specifies the performance requirements for clothing made with flexible materials that are designed to protect the wearer's body from heat and / or flame.

UNI EN 1149-5:2008 - La norma specifica i requisiti del materiale da utilizzare per gli indumenti di protezione che devono dissipare le cariche elettrostatiche, per evitare scariche che possano innescare scintille.

UNI EN 1149-5:2008 - The standard specifies the requirements of the material to be used for protective clothing that must dissipate electrostatic charges, to avoid discharges that can cause sparks.

EN 14058 - EN 14058 - La norma specifica requisiti e metodi di prova per la prestazione di capi di abbigliamento per la protezione contro gli ambienti più freddi di -5 °C: basse temperature dell'aria, umidità e velocità dell'aria.

EN 14058 - The standard specifies requirements and test methods for the performance of clothing for protection against environments colder than -5 °C: low air temperatures, humidity and air velocity.

EN ISO 13688:2013 - La norma disciplina i requisiti generali per ergonomia, invecchiamento, taglie e marcatura degli indumenti di protezione. I capi vengono progettati e fabbricati offrendo al portatore il massimo grado di comfort.

EN ISO 13688: 2013 - The standard governs the general requirements for ergonomics, aging, sizing and marking of protective clothing. The garments are designed and manufactured offering the wearer the maximum degree of comfort.

MARCATURA CE - Il simbolo che garantisce la conformità del capo alla direttiva europea sui DPI 89/686/CEE e alla normativa relativa ai requisiti generali degli indumenti di protezione UNI EN ISO 13688:13.

CE MARKING - The symbol that guarantees the compliance of the garment with the European directive on PPE 89/686 / EEC and with the legislation relating to the general requirements of protective clothing UNI EN ISO 13688: 13.

OEKO-TEX STANDARD 100 - Standard unico di certificazione e controllo nel settore in tutte le fasi di lavorazione, che permette di identificare quei prodotti che non presentano alcun rischio per la salute del consumatore.

OEKO-TEX STANDARD 100 - Single standard of certification and control in the sector at all stages of processing, which allows to identify those products that do not present any risk to the health of the consumer.

REGOLAMENTO REACH - Regolamento europeo che vieta, nei processi di tintura e finissaggio industriale tessile, l'utilizzo di sostanze chimiche dannose per la salute umana e per l'ambiente.

REACH REGULATION - European regulation that prohibits the use of chemicals that are harmful to human health and the environment in industrial textile dyeing and finishing processes.

TECHNOLOGIES

FEELING THE INNOVATION

Non ci accontentiamo delle certificazioni.

Innovazione per noi vuol dire andare oltre i criteri di qualità e offrire capi in grado di superare ogni aspettativa. Worik vanta una forte competenza sulle tante e diverse proprietà che un abbigliamento tecnico deve possedere: traspirabilità e termoregolazione, protezione e durevolezza, comfort e vestibilità, funzionalità e versatilità.

We are not satisfied with certifications.
For us, innovation means going beyond quality criteria and offering garments that can exceed all expectations.
Worik boasts a strong expertise on the many and different properties that technical clothing must possess: breathability and thermoregulation, protection and durability, comfort and fit, functionality and versatility.

PERFORMING TECHNOLOGIES

Per assicurare **prestazioni contenitive, stabilizzanti o ammortizzanti** a seconda dell'esigenza, favorendo l'ossigenazione muscolare, alleviando il senso di fatica, ritardando la stanchezza, riducendo l'insorgenza di infortuni e migliorando complessivamente le performance.

To ensure containment, stabilizing or shock-absorbing performance according to need, promoting muscle oxygenation, relieving the sense of fatigue, delaying fatigue, reducing the occurrence of injuries and improving overall performance.

① NO STRESS SEAM

Cucitura extra-fine e con rimaglio elettronico SbyS.
Extra-fine stitching and with SbyS electronic linking.

② TWIST BLOCK

Fascia elastica anti-torsione per favorire aderenza e stabilità.
Anti-torsion elastic band to promote grip and stability.

③ GRIP TECH

Cuscinetto protettivo/ammortizzante anti sfregamento e concussione della zona plantare, differenziato per piede destro e sinistro.
Protective / shock-absorbing cushion against rubbing and concussion of the plantar area, differentiated for right and left foot.

④ MEMORY SHAPE

Elastomero con "memoria" che dal primo utilizzo si adatta alle forme del corpo memorizzando la sagoma ideale e mantenendola nel tempo e nei lavaggi.
Elastomer with "memory" that from the first use adapts to the shape of the body, memorizing the ideal shape and maintaining it over time and during washing.

⑤ PERMA FIT

Struttura a densità differenziata per prevenire la formazione di grinze nelle zone articolari e per sostenere il movimento di qualsiasi intensità.
Differentiated density structure to prevent the formation of wrinkles in the joint areas and to support movement of any intensity.

PROTECTIVE TECHNOLOGIES

Per difendere il corpo da agenti esterni, grazie a **proprietà idrorepellenti, ignifughe, anti odore o anti batteriche**, e proteggere il capo nei punti critici da usura e frizione, conferendo resistenza e durevolezza al prodotto.

To defend the body from external agents, thanks to its water-repellent, fire-retardant, anti-odor or anti-bacterial properties, and protect the garment in critical points from wear and friction, giving the product resistance and durability.

6 JUNCTURE SHIELD

Struttura anatomica di rinforzo per proteggere e ammortizzare lo sforzo e l'usura subiti dalle giunture e dagli arti inferiori, con bilanciamento fra lato destro e sinistro.

Anatomical reinforcement structure to protect and cushion the strain and wear suffered by the joints and lower limbs, with balance between the right and left side.

7 HEEL TOE TRASPIRANT

Punta e tallone traspiranti e rinforzati per proteggere e rinfrescare il piede ed aumentare la resistenza all'usura.

Breathable and reinforced toe and heel to protect and refresh the foot and increase wear resistance.

8 HYDRA BARRIER

Trattamento chimico e antibatterico non invasivo per assicurare una completa impermeabilità oleo-idro dinamica.

Non-invasive chemical and antibacterial treatment to ensure complete oleo-hydro-dynamic waterproofing.

9 TEND SHIELD

Flange stabilizzanti e protettive per prevenire l'insorgenza di irritazioni o vesciche e migliorare la vestibilità.

Stabilizing and protective flanges to prevent irritation or blisters and improve fit.

10 ANTI RUSH

Inserti anatomici in nylon ad alta resistenza e trattamento con nano particelle PTFE che riducono l'attrito prevedendo la formazione di irritazioni nei punti di maggior sfregamento.

Anatomical inserts in high-strength nylon and treatment with PTFE nano particles that reduce friction by providing for the formation of irritation in the points of greatest friction.

11 OMNI SHIELD

Miscele di materiali tecnici per conferire ai tessuti particolari caratteristiche come: rinfrescante, riflettente, ignifugo, antistatico, antibatterico, antitaglio, fiamma retardante e antiusura.

Mixtures of technical materials to give the fabrics particular characteristics such as: refreshing, reflective, fireproof, antistatic, antibacterial, anti-cut, flame retardant and anti-wear.

TERMOREGULATING TECHNOLOGIES

Per garantire un **equilibrio termico costante** e la traspirazione del corpo in ogni condizione di caldo, freddo, umidità o variabile nel tempo.

To ensure a constant thermal equilibrium and perspiration of the body in all conditions heat, cold, humidity or variable over time.

12 DRY TECH

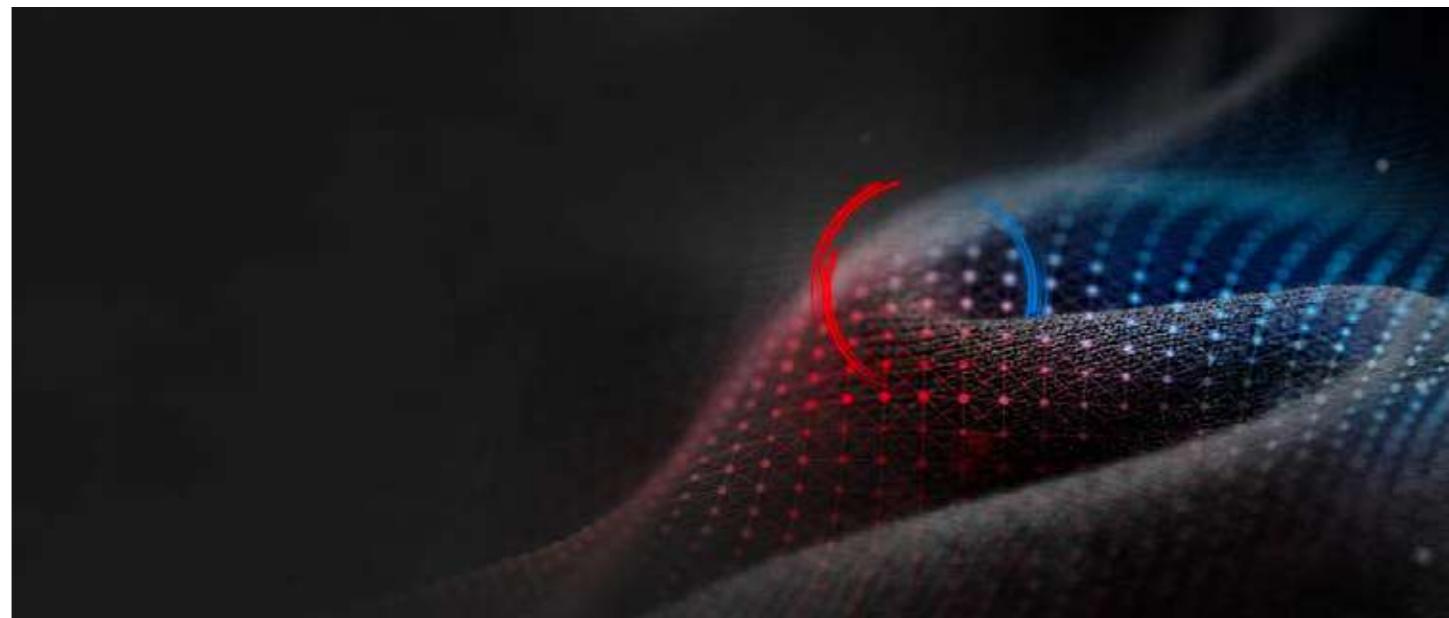

Trama a nido d'ape ed inserti in trama aperta con elevata capacità traspirante per mantenere il microclima interno ideale.

Honeycomb weave and open weave inserts with high breathability to maintain the ideal internal microclimate.

13 AERO DIAMOND

Maglia indemagliaibile, con struttura a diamante per l'areazione e la traspirazione di umidità e calore dalle zone critiche. Perfetta anche durante gli sforzi più intensi.

Warp-knit jersey, with diamond structure for ventilation and transpiration of moisture and heat from critical areas. Perfect even during the most intense efforts.

ANATOMICAL TECHNOLOGIES

Per offrire una sensazione di **comfort** e **aderenza** in maniera costante e duratura, eliminando ogni fattore di fastidio e scomodità e garantendo **perfetta vestibilità** al capo in ogni condizione.

To offer a feeling of comfort and grip in a constant and lasting way, eliminating every annoyance and inconvenience factor and ensuring perfect fit to the garment in all conditions.

14 LEFT-RIGHT SINERGY

Struttura differenziata tra arto destro e sinistro su punte e struttura a "Y" sul tallone per garantire prestazioni ottimali.

Differentiated structure between right and left limb on toes and "Y" structure on the heel to ensure optimal performance.

15 TIGHT PROFILES

Profili senza cuciture ed estremità elasticizzate per un comfort ed aderenza assoluti.

Seamless profiles and elasticated ends for absolute comfort and grip.

16 SECOND SKIN

Tecnologia di 'taglio vivo' (senza cuciture) ed inserti di elastomeri per una sensazione di vestibilità senza precedenti.

'Raw cut' technology (without seams) and elastomer inserts for an unprecedented feeling of fit.

POSTURAL TECHNOLOGIES

Per ritardare l'insorgenza della sensazione di pesantezza e fatica, per aumentare l'apporto di ossigeno ai muscoli generando una **sensazione di benessere e vitalità**.

To delay the onset of the feeling of heaviness and fatigue, to increase the supply of oxygen to the muscles, generating a feeling of well-being and vitality.

17 SMART FLOW

Trama a compressione graduata per favorire la circolazione sanguigna ed esoscheletro elastico per sostenere la massa muscolare a vantaggio delle performance.

Graduated compression weave to promote blood circulation and elastic exoskeleton to support muscle mass for the benefit of performance.

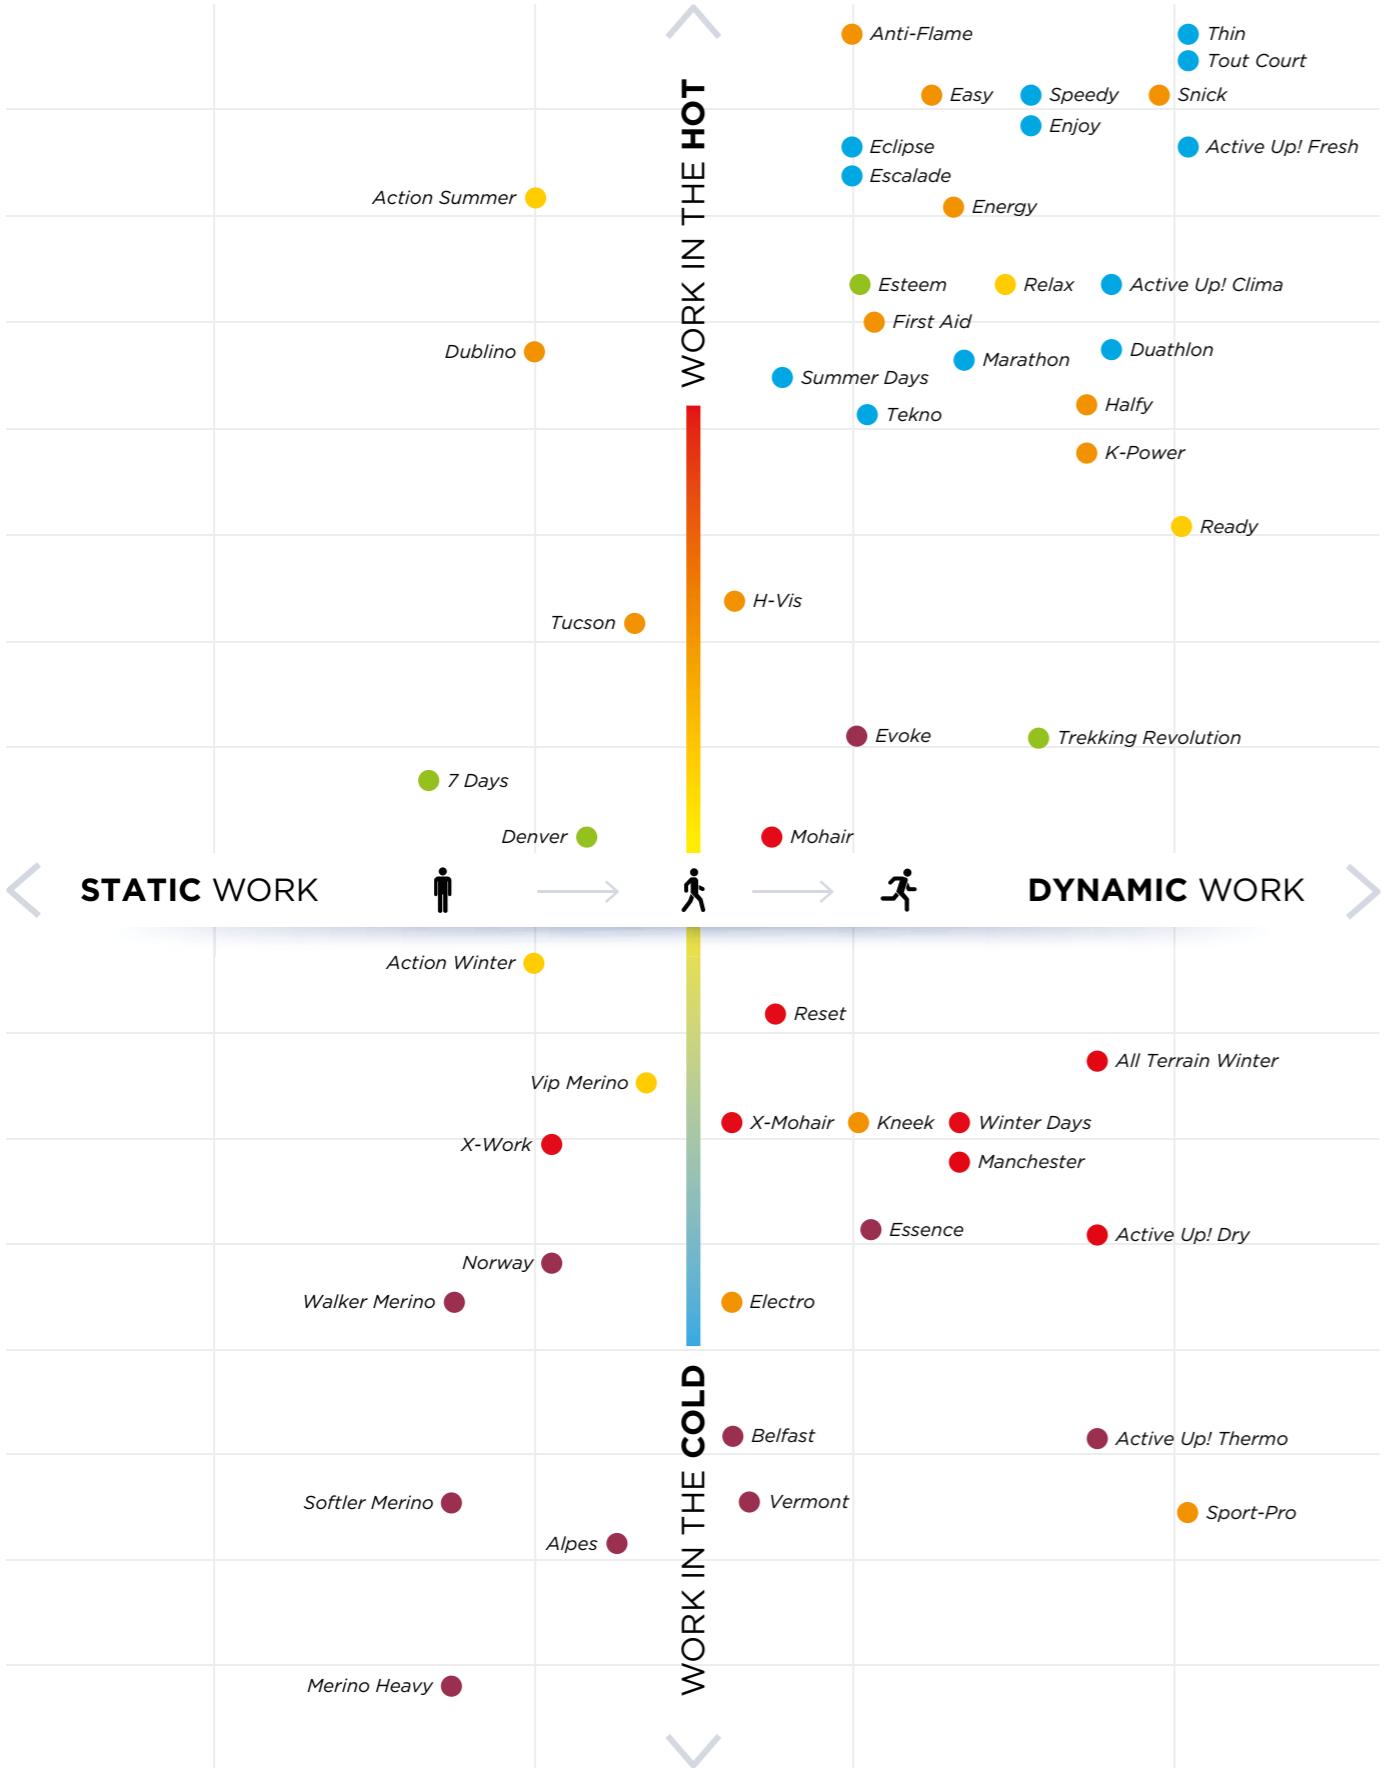

18 KINETIC SENSE

Profili anatomici elasticizzati sui principali gruppi muscolari per donare una maggiore libertà di movimento, estensione ed espansione.

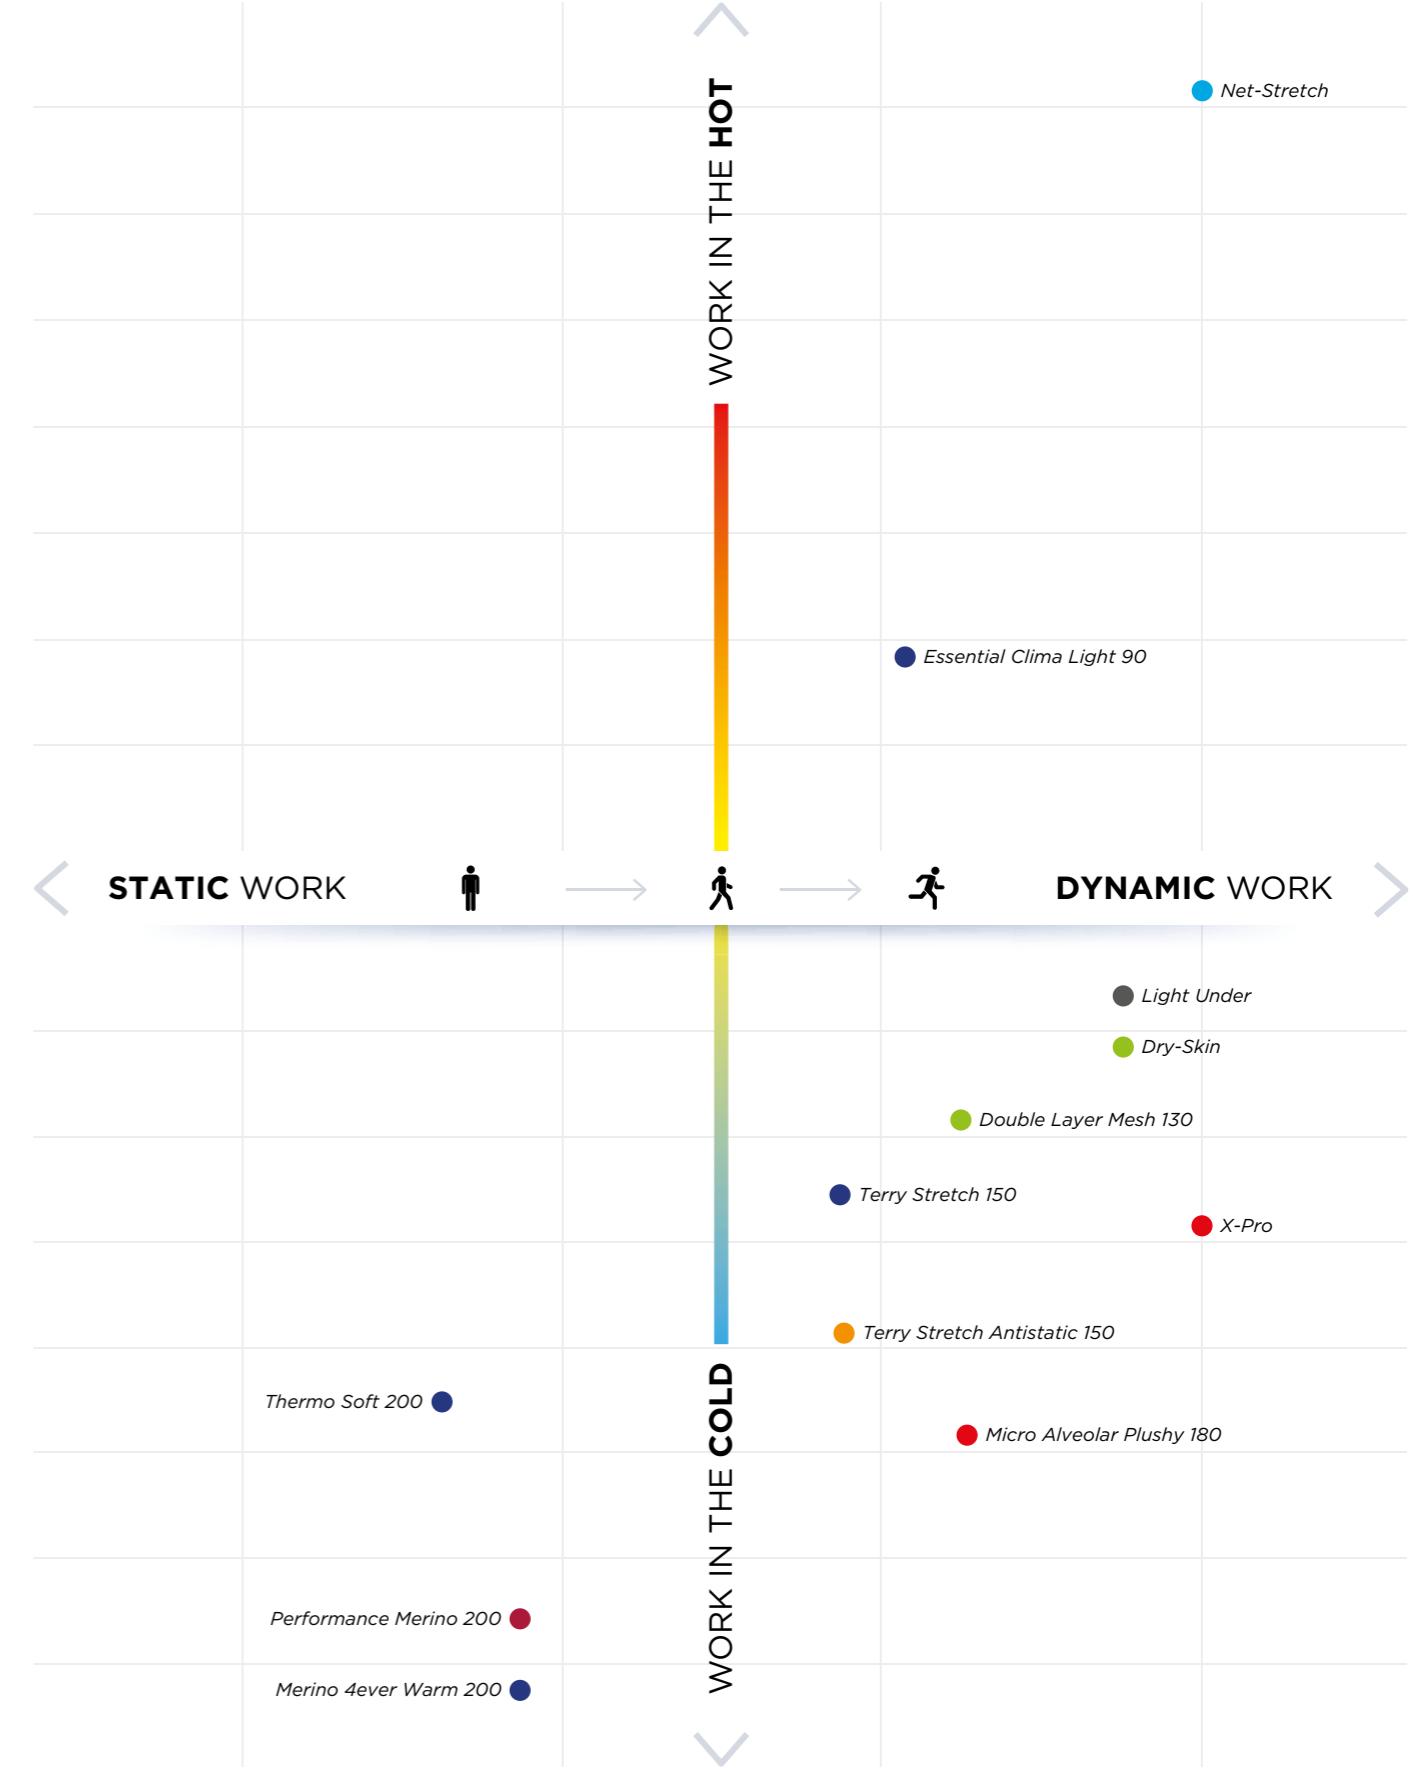

Anatomical elastic profiles on the main muscle groups to give greater freedom of movement, extension and expansion.

ANTI-FLAME PRO

cod. AFPH | HALF-CUT | 65 gr/pa

Consigliata in ambienti ATEX, calza realizzata con **fibra PROTAL1®** intrinsecamente **ignifuga**. Il tessuto assicura una protezione totale del piede contro i rischi termici provocati dal contatto accidentale con fiamme libere e/o esposizione a fonti di calore convettive e radianti. Il **filato antistatico**, distribuito uniformemente lungo tutta la calza, assicura un'efficace dissipazione delle cariche elettrostatiche. Il tessuto a maglia, **traspirante e antibatterico**, testato per soddisfare le normative EN 11612 A1 B1 C1:2015 e EN1149-5:2008, assicura completa protezione dalle cariche elettrostatiche, con punta e talloni rinforzati.

Recommended in ATEX environments, socks made with intrinsically fireproof PROTAL1® fiber. The fabric ensures total protection of the foot against thermal risks caused by accidental contact with open flames and / or exposure to convective and radiant heat sources. The **antistatic yarn**, evenly distributed throughout the sock, ensures effective dissipation of electrostatic charges. The **breathable and antibacterial** knitted fabric, tested to meet the EN 11612 A1 B1 C1: 2015 and EN1149-5: 2008 standards, ensures complete protection from electrostatic charges, with reinforced toe and heels.

Il tessuto assicura una protezione totale del piede contro i rischi termici provocati dal contatto accidentale con fiamme libere e/o esposizione a fonti di calore convettive e radianti. Il **filato antistatico**, distribuito uniformemente lungo tutta la calza, assicura un'efficace dissipazione delle cariche elettrostatiche. Il tessuto a maglia, **traspirante e antibatterico**, testato per soddisfare le normative EN 11612 A1 B1 C1:2015 e EN1149-5:2008, assicura completa protezione dalle cariche elettrostatiche, con punta e talloni rinforzati.

Recommended in ATEX environments, socks made with intrinsically fireproof PROTAL1® fiber. The fabric ensures total protection of the foot against thermal risks caused by accidental contact with open flames and / or exposure to convective and radiant heat sources. The **antistatic yarn**, evenly distributed throughout the sock, ensures effective dissipation of electrostatic charges. The **breathable and antibacterial** knitted fabric, tested to meet the EN 11612 A1 B1 C1: 2015 and EN1149-5: 2008 standards, ensures complete protection from electrostatic charges, with reinforced toe and heels.

MERINO

INNOVAZIONE A PELLE

Tutti i prodotti in lana Merino sono molto resistenti, leggeri e principalmente **termoregolanti**, riparano infatti il nostro corpo dal freddo, anche nel caso di temperature estremamente basse. È inoltre un **tessuto traspirante** che non opprime la pelle.

La lana Merino è una qualità particolarmente pregiata di lana, ricavata dal vello dell'omonima razza di pecore. Questa lana è molto **morbida e confortevole** poiché è molto più sottile rispetto a una lana normale, risultando molto gradevole al tatto e **riducendo irritazione ed allergia**.

Utilizziamo solo lana Merino proveniente da filature **Mulesing Free**, ossia una procedura che aiuta la salvaguardia delle pecore.

All Merino Wool products are very resistant, lightweight and, above all, thermoregulating. In fact, they protect our body from the cold, even in the event of extremely low temperatures. It is also a breathable fabric that does not suffocate the skin. Merino Wool is a particularly prized quality of wool, received from the fleece of sheep of that name. This wool is very soft and comfortable, because it is much finer than normal wool, making it very pleasant to the touch and reducing irritation and allergy. We use only Merino Wool from filature that is Mulesing Free, a procedure that helps safeguard the sheep.

CONCEPT PROTECH

TSA 150

TERRY STRETCH ANTISTATIC | 150 gr/sqm

Tessuto **termoregolante e antifreddo**, ideale per chi opera in ambienti a bassa temperatura o esterni in stagione invernale. L'utilizzo della **microfibra di carbonio No-Shock** è in grado di dissipare le cariche elettrostatiche, azzerare la proliferazione di batteri e svolgere una funzione antistress. La capacità conduttrice della fibra di carbonio, in termini di prestazione dissipativa, è la migliore in assoluto e tale da rendere i capi realizzati con questa fibra **rispondenti alle norme europee per i DPI antistatici-dissipativi**. Le proprietà anallergiche del carbonio lo rendono inoltre vestibile a prima pelle anche da individui epidermicamente sensibili.

Thermoregulating and anti-cold fabric, ideal for those who work in low-temperature environments or outdoors in winter. The use of No-Shock carbon microfiber is able to dissipate electrostatic charges, eliminate the proliferation of bacteria and perform an anti-stress function. The conductive capacity of carbon fiber, in terms of dissipative performance, is the best ever and such as to make garments made with this fiber compliant with European standards for antistatic-dissipative PPE. The hypoallergenic properties of carbon also make it wearable at first skin even by epidermically sensitive individuals.

NET STRETCH

NET STRETCH | 70 gr/sqm

Prodotta con innovativa tecnologia a **rete elasticizzata indemagliaibile in compressione graduata** che genera un effetto "avvolgente" e di massima aderenza al corpo. È così in grado di aumentare le capacità di traspirazione del tessuto e l'aerazione della pelle.

Il **sistema di tessitura Net-Stretch** genera una capacità di **estensione tridimensionale** (lunghezza, larghezza e profondità) così elevata da garantire la capacità di vestire tutte le taglie. La struttura a rete combinata con il movimento del corpo genera un sistema di **auto ventilazione** che accelera il processo di espulsione del sudore e di asciugatura della pelle. Tessuto batteriostatico. Un capo perfetto per l'utilizzo in ambienti extra caldi o attività molto intense.

Produced with innovative warp-knit stretch mesh technology in **graduated compression** that generates an "enveloping" effect and maximum adherence to the body. It is thus able to increase the transpiration capacity of the fabric and the aeration of the skin. The **Net-Stretch weaving system** generates a three-dimensional extension capacity (length, width and depth) so high as to guarantee the ability to fit all sizes. The mesh structure combined with the movement of the body generates a **self-ventilation** system that accelerates the process of expelling sweat and drying the skin. Bacteriostatic tissue. A perfect garment for use in extra hot environments or very intense activities.

DRY-SKIN

DRY-SKIN | 140 gr/sqm

Intimo realizzato in tecnologia di **tessitura Seamless** con filati **Dryarn®** e Lycra per garantire la migliore vestibilità, funzionalità e durata nel tempo. La **compressione graduata** che lo caratterizza stimola il flusso sanguigno capillare mantenendo più a lungo la tonicità muscolare e riducendo il senso di stanchezza. Le fibre utilizzate sono tutte anallergiche e garantiscono così comfort estremo. Il polipropilene Dryarn® mantiene asciutto e climatizzato il corpo sia in estate che in inverno e in ogni condizione operativa. Il tessuto ha proprietà batteriostatiche che azzerano la proliferazione di batteri, che possono generare muffe, micosi e sgradevoli odori. Il Lycra conferisce morbidezza, stabilità dimensionale (anche dopo molti lavaggi), rapida asciugatura e nessuna necessità di stiratura.

Underwear made in **Seamless weaving** technology with **Dryarn®** and Lycra yarns to guarantee the best fit, functionality and durability. The **graduated compression** that characterizes it stimulates capillary blood flow, maintaining muscle tone for longer and reducing the sense of fatigue. The fibers used are all hypoallergenic and thus guarantee extreme comfort. Dryarn® polypropylene keeps the body dry and air-conditioned both in summer and in winter and in all operating conditions. The fabric has bacteriostatic properties that eliminate the proliferation of bacteria, which can generate mold, mycosis and unpleasant odors. Lycra gives softness, dimensional stability (even after many washes), quick drying and no need for ironing.

CONCEPT MEDIUM

DLM 130

DOUBLE LAYER MESH | 130 gr/sqm

Tessuto 100% polipropileno termoregolante ed antifreddo è ideale per chi opera in ambienti a bassa temperatura ed esterni in stagione invernale ma si adatta perfettamente anche alle medie temperature.

Realizzato in lavorazione con **doppio strato a maglia traforata asimmetrica**, garantisce un'elevata traspirabilità e rimozione dell'umidità corporea, mantenendo la pelle sempre asciutta. Di rapida asciugatura, è **idrorepellente** e **antimacchia** ed inattaccabile da muffe e batteri con proprietà anallergiche e antiodoranti.

I tessuti utilizzati rispettano i parametri ecotossicologici Oeko-Tex Standard 100.

100% heat-regulating and anti-cold polypropylene fabric is ideal for those who work in low-temperature and outdoor environments in winter but also adapts perfectly to medium temperatures. Made with a **double layer of asymmetrical perforated mesh**, it guarantees high breathability and removal of body moisture, keeping the skin always dry. Quick drying, it is **water repellent and stain resistant** and resistant to mold and bacteria with hypoallergenic and anti-odor properties.

The fabrics used comply with the Oeko-Tex Standard 100 ecotoxicological parameters.

CONCEPT **MERINO**

NEW

PERFORMANCE MERINO | 200 gr/sqm

La lana Merino è la fibra che si ottiene dalle pecore di razza Merino. Questo tipo di lana è particolarmente ricercata per via della sua **finezza e morbidezza**, che offre il massimo comfort a contatto con la pelle. Assorbe il sudore in eccesso neutralizzandone le sostanze nocive, evita qualsiasi colpo di freddo trattenendo il calore prodotto dal corpo e fornisce un valido aiuto alla **prevenzione** dei dolori articolari. Inoltre ha un effetto antiparassitario poiché la struttura del filamento impedisce l'accumulo di sporco. La sofficità e la morbidezza di questa fibra attutiscono in modo eccellente le vibrazioni.

Merino wool is the fiber obtained from Merino sheep. This type of wool is particularly sought after due to its fineness and softness, which offers maximum comfort in contact with the skin. It absorbs excess sweat by neutralizing harmful substances, avoids any cold by retaining the heat produced by the body and provides a valuable aid in the **prevention** of joint pain. It also has an anti-parasitic effect since the structure of the filament prevents the accumulation of dirt. The softness and softness of this fiber excellently dampen vibrations.

La pura lana Merino offre il massimo comfort e una capacità di termoregolazione perfetta in qualsiasi condizione climatica ambientale, dal freddo estremo al caldo eccessivo. Tutte le fibre utilizzate godono di eccellenti proprietà antibatteriche, idrorepellenti, antimacchia, antimuffa, antiodoranti e anallergiche che permettono un elevato livello di igiene anche dopo innumerevoli ore di utilizzo senza lavaggio. **Cuciture piatte e modello ad alta vestibilità.** I tessuti utilizzati rispettano i parametri eco tossicologici Oeko-Tex Standard 100.

The pure Merino wool offers maximum comfort and a perfect thermoregulation capacity in any environmental climatic condition, from extreme cold to excessive heat. All the fibers used have excellent antibacterial, water-repellent, stain-resistant, anti-mold, anti-odor and hypoallergenic properties that allow a high level of hygiene even after countless hours of use without washing. **Flat seams and high-fit model.** The fabrics used comply with the Oeko-Tex Standard 100 eco-toxicological parameters.

LIGHT UNDER

LIGHT UNDER | 130 gr/sqm

Intimo senza cuciture realizzato con tecnologia di **tessitura seamless** per garantire la migliore vestibilità, funzionalità e durata nel tempo. La **compressione graduata** stimola il flusso sanguigno mantenendo più a lungo la tonicità muscolare e riducendo il senso di stanchezza. **Tessuto termoregolante**, ideale per chi opera in ambienti a bassa temperatura ed esterni in stagione invernale, mantiene una temperatura del corpo costante e garantisce l'isolamento termico. Di rapida asciugatura, è idrorepellente, antimacchia ed inattaccabile da muffe e batteri, con proprietà anallergiche e antiodoranti.

Seamless underwear made with **seamless weaving technology** to ensure the best fit, functionality and durability. **Graduated compression** stimulates blood flow while maintaining muscle tone for longer and reducing the sense of fatigue. **Thermoregulating fabric**, ideal for those who work in low-temperature environments and outdoors in the winter season, it maintains a constant body temperature and guarantees thermal insulation. Quick-drying, it is water-repellent, stain-resistant and resistant to mold and bacteria, with hypoallergenic and anti odor properties.

COMPOSITION: 55% PA NYLON | 40% PP POLYPROPYLENE
5% EA ELASTANE

HAND

cod. HAND | SOTTOGUANTI - UNDER GLOVES

Privo di cuciture, il tessuto garantisce vestibilità e un comfort assoluto pari a una seconda pelle. Lo strato a contatto con la pelle è batteriostatico, realizzato in polipropilene **Dryarn®**, permette di trattenere il calore ed espellere velocemente l'umidità che si crea internamente. Perfetto come guanto unico con temperature più miti (+10°) oppure in abbinamento ad un altro guanto nei climi più rigidi (dai -20° ai +5°).

Without **seams**, the fabric guarantees fit and absolute comfort equal to a second skin. The layer in contact with the skin is bacteriostatic, made of **Dryarn®** polypropylene, allowing it to retain heat and quickly expel the moisture that is created internally. Perfect as a single glove with milder temperatures (+ 10 °) or in combination with another glove in more rigid climates (from -20 ° to + 5 °).

COMPOSITION: 44% PP POLYPROPYLENE | 44% PA NYLON
12% EA ELASTANE

SIZE CONVERSION TABLE

MEASUREMENT

La tabella riporta taglie indicative. Si consiglia, laddove possibile, una verifica a capo indossato. Le misure indicate si riferiscono al capo steso. Non tutte le taglie sono prodotte per ogni modello.

The table shows indicative sizes. It is advisable, where possible, to check the garment worn. The measures indicated refer to the stretched garment. Not all sizes are produced for every model.

ALPHANUMERIC CODE

La codifica identificativa degli articoli è definita da un codice alfanumerico così strutturato.

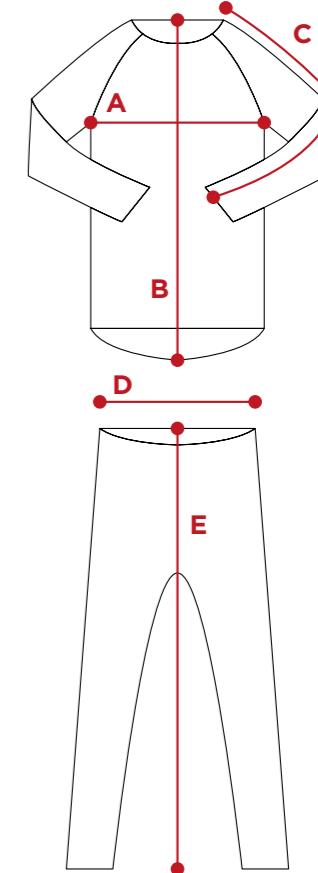

Esempio > MTHS_61_2

MTHS = codice articolo | 61 = codice colore | 2 = codice taglia

The identification code of the articles is defined by an alphanumeric code structured as follows.

Example > MTHS_61_2

MTHS = article code | 61 = color code | 2 = size code
